

iPaaS Solutions

Integration Platform as Service (iPaaS) solutions allow us to build integrations between disparate systems using out of the box connectors

Problem/Challenge

Companies undergoing Digital Transformation tend to have multiple disparate systems to integrate traditional applications, cloud native applications and third party SaaS products

What questions are we answering?

- Do we go with low code no code platforms?
- How can we integrate multiple different systems and monitor and manage these integrations?

Our Approach

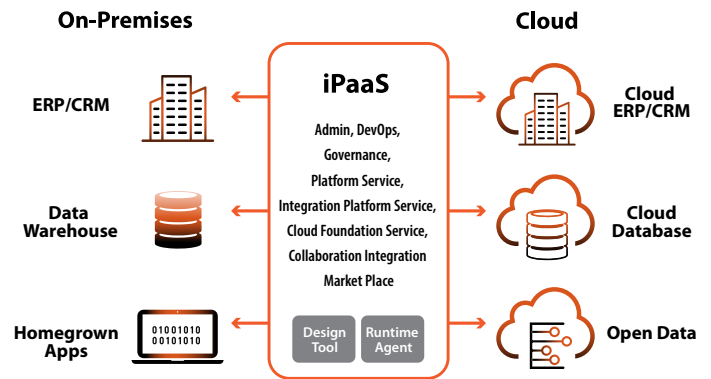

- truData partners with clients in building Integration Platform as Service (iPaaS) solutions between disparate systems using out of the box connectors.
- We help automate your business-critical workflows to save on operations.
- truData supports companies with seamless DevOps and system monitoring to ensure your workflows operate with high efficiency.

Tools Involved

Azure Logic Apps, Functions, Azure API Management, Azure DevOps, MuleSoft, Dell Boomi

Integration using iPaaS

Business Benefit

- Lower cost of development and maintenance with low code or no code
- Pay as you go
- Integrate systems faster, results in quicker release to market

truData Overview

truData is an industry-leading cloud professional services company, focused on application modernization, innovations and integrations. We have established several key strategic channel partnerships with MS Azure, AWS, Google Cloud Platform, Snowflake and SAP.

truData's partners with clients in the delivery of strategy and roadmap, project implementation, application managed services and staff augmentation capabilities.

- 10+** Years of Cloud Experience
- 20+** Years of Analytics and Data Warehousing Experience
- 150+** Data Scientists and Engineers

Our MultiShore model offers several options, including **truData's** nearshore and offshore capabilities that provide 0800hrs–1700hrs coverage at an improved price point without sacrificing quality of delivery. This is realized through **truData's** North and Central America, Asia and Europe operations.

Strategic Partnerships

truData's strategic partnerships complement our cloud modernization services and allow us to deliver multi-faceted programs to solve your most critical business needs.

Our Capabilities

- Cloud Data Warehousing
- Data Management and Governance
- Cloud Integration (iPaaS)
- Application Modernization
- Cloud Migration
- Machine Learning and Artificial Intelligence
